1 makefile

1.1 ELSE 应该小写。

现象：

编译 seprator 错误。同时指向行号为后面的 foreach 处

解决：

ELSE 应该小写。

```
ifeq ($(ADD_HEXO_HEAD),TRUE)
  @echo start hexo head output...
  $$(file >$$@.tmp,$$(call def_hexo_md_head,$(subst $(SUFFIX_TO),,$(notdir $(1)))))
# @echo $$(TBFILENAME)+2
# @echo $(subst $(SUFFIX_TO),,$(notdir $(1)))+1#直接函数填入才能取到。
  @echo convert to utf8
  iconv -f GBK -t UTF-8 $$@.tmp >$$@
  @echo start pandoc $(SUFFIX_FROM)2$(SUFFIX_TO)...
  pandoc $$< -o - >>$$@
  @echo delete .tmp file...
  del $$@.tmp
ELSE
  @echo start pandoc $(SUFFIX_FROM)2$(SUFFIX_TO)...
  pandoc $$< -o $$@
endif
$(foreach temp,$(OBJ_PATH_MDS),$(eval $(call PROGRAM_template,$(temp))))
```
